

The CARL Portage Network

RDC Webinar, February 8, 2017

Chuck Humphrey

Webinar Recording Policy / Politique concernant l'enregistrement des webinaires

This webinar will be recorded and archived, including all audio. The video will be archived on the CANARIE YouTube channel and may be promoted through RDC and/or CANARIE communication channels.

Any text questions or comments, if responded to, will remain anonymous and not be part of the recording. The recorded video will include your voice, if audio participation is enabled.

Ce webinaire sera enregistré puis archivé, son compris. La vidéo sera conservée sur le canal YouTube de CANARIE et pourra être promue au moyen des filières de communication de DRC et de CANARIE.

Si on y répond, les questions écrites et orales demeureront anonymes et ne feront pas partie de l'enregistrement. Toutefois, si la fonction « participation audio » a été activée, le fichier vidéo inclura votre voix.

The Canadian Association of Research Libraries (CARL) is the leadership organization of Canada's 29 largest university libraries and two federal institutions (LAC & NRC Science Library). CARL members support Canada's research community by:

- Working to improve access to knowledge;
- Improving services to students, faculty and researchers;
- Promoting effective and sustainable scholarly communication;
- Ensuring that Canada's researchers have world class information management capacities;
- Sharing best practices and experiences,
- Advocating public policies that enable broad access to scholarly information.

Timeline of engagement

- 2009 (Nov): Workshop introducing research data management to librarians
- 2010-2011: Research Data Management Infrastructure funding application
- 2013 (Jan): Workshop on planning research data management services
- 2013 (Dec): ARC pilot
- 2014 (Sep): Progress review of Federated Pilot projects
- 2015 (Apr-May): Framework and transition plan from pilot to operating network

Collaborators in Research Data Management

Research Data Canada – Données de Recherche Canada

Directions for Research Data Management (RDM)

- RDM multi-sector stakeholders' forum
- RDM policy & best practices directions
- International RDM voice for Canada
- Strategic & competitive RDM investments

Facilitating the development of a best practices, sustainable national RDM ecosystem.

Supported by:

canarie

SERVICES PARTAGÉS POUR LES DONNÉES DE RECHERCHE
SHARED STEWARDSHIP OF RESEARCH DATA

Operations for Research Data Management (RDM)

- RDM community of practice
- RDM services & infrastructure platforms
- National RDM network of expertise
- Coordination of library-based RDM initiatives

Developing and delivering RDM services and resources to Canadian universities and partners.

Supported by:

CANADIAN ASSOCIATION OF RESEARCH LIBRARIES
ASSOCIATION DES BIBLIOTHÈQUES DE RECHERCHE DU CANADA

Levels at which to collaborate

Portage aims to provide services and infrastructure platforms at the levels of the research project, the institution, and the network.

By network, we mean collaborating in regional and national partnerships.

Shared stewardship

Shared stewardship

Research data culture

- The values and norms that provide an understanding of research data in our society.
 - Data culture of use → evidence-based actions
 - Data culture of sharing → allowing others access to your research data
 - Data culture of stewardship → taking responsibility for the long-term access to your research data

Tri-Agency Statement of Principles

- The Tri-Agency Statement of Principles on Digital Data Management is an example of values dealing with research data use, sharing, and stewardship.

The agencies believe that research data collected with the use of public funds belong, to the fullest extent possible, in the public domain and available for reuse by others. They also strongly support the creation of a robust and efficient environment for data stewardship in Canada and internationally. [p. 2]

Tri-Agency Statement of Principles

- The statement further describes practices that support these values:
 - Data management planning
 - Working within legal and ethical obligations
 - Adherence to standards
 - Secure digital practices
 - Providing quality metadata
 - Preserving, retaining, and sharing
 - Timely sharing
 - Citation and attribution
 - Efficient and cost effective practices

Portage Principles

- Research data are a public good
- Intelligent access: openness, with respect for privacy
- Collaborative approaches: cost savings and shared expertise
- Inclusiveness: aim to serve all researchers and create a more level playing field
- Commitment to standards and interoperability
- International relationships: liaise internationally and ensure Portage keeps pace with international practices
- Respect for differences: flexibility to meet the needs of different regions, institutions, and disciplines
- Open source: Tools will be contributed back to the community
- Stewardship: a sense of responsibility for managing research data over the long term

December 2013

Community of practice

- Portage is working with other research data management stakeholders in developing a broader community of practice dealing with the use, sharing, and stewardship of research data.
- Portage is working specifically with library colleagues addressing the culture of data stewardship.

THE PORTAGE NETWORK is dedicated to the shared stewardship of research data in Canada through:

- Developing a national research data culture
- Fostering a community of practice for research data
- Building national research data services and infrastructure

Launched in 2015 by the [Canadian Association of Research Libraries](#), Portage works within the library community to coordinate expertise, services, and technology in research data management, seeking to collaborate with other research data management stakeholders.

Research data culture represents widely shared values and principles for digital data management.

A community of practice for research data consists of stakeholders working collaboratively to ensure data are accessible to address complex research issues.

Research data management activities span sectors, domains, and jurisdictions,

The Portage service model

A model built on partnership and collaboration

- A federated model has been adopted by CARL that leverages coordinated RDM contributions from libraries and partnering stakeholders.

See Humphrey, C., Shearer, K. & Whitehead, M. (2016). Towards a Collaborative National Research Data Management Network. Paper presented at: 11th International Digital Curation Conference.

The Portage service model

A federated vision:

- This federated structure consists of a **Network of Expertise** and **platforms** to support data management planning, data curation, data preservation, and data discovery.
- Experts are located in individual institutions but are coordinated to provide services and advice from a network level.

Portage RDM Framework

Network of Expertise

- Members of expert groups agree to two year commitments; working group members serve for three to six months on task-specific activities.
- The Chairs of the Expert Groups are members of the Council of Chairs, which is responsible for coordinating overlap among the groups, for planning short and longer term goals of Portage, and for identifying budgetary items associated with each group.

Network of Expertise

Expert Group	Number of Individuals	Number of Unique Institutions
DMPEG	16	14
CEG	5	5
PEG	4	4
DEG	6	6
TEG	7	6
RIEG	6	6
TOTAL	44 [†]	19

[†] Seven of the members serve on multiple expert groups, including the Portage Director, who is an ex officio member of all groups. Thirty-three individuals are currently serving in the 44 positions.

Discovery working groups

Regional consortium	Metadata WG	Collection Development WG	Total

RDMI Functional Framework

- The infrastructure supporting the stages of the RDM lifecycle is built on partnerships with stakeholders and respects the diversity of research data arising from a spectrum of domains.

RDMI = Research data management infrastructure

RDMI Functional Framework

- The Portage RDMI Framework specifies the functional requirements for the stages of the data lifecycle. These major functions are divided into subfunctions and aligned with microservices to support the digital services needed by both project level RDM and institutional support for long-term data access and stewardship.

A Functional Framework for a Research Data Repository

RDM Platforms

- Partner with infrastructure providers to offer research data management (RDM) platforms
 - Launched DMP Assistant in October 2015
 - Introduced customized spaces for institutions in the summer of 2016
 - Finalizing a help desk ticketing service
 - Collaborate in the unification of the codebase for DMP Online (DCC) and DMP Tool (CDL)
 - Completed a pilot with SSHRC and 13 research projects on January 24, 2017

Signed out successfully.

DMP Assistant is a bilingual tool for preparing data management plans (DMPs). The tool follows best practices in data stewardship and walks researchers step-by-step through key questions about data management.

Step 1

Sign up with DMP Assistant

Step 2

Sign in and select a template under Organizations. The Portage template is the default.

Step 3

Answer the questions that are relevant to your work. Guidance and examples are provided.

Step 4

Revisit the tool throughout your research to review or revise your answers.

Sign in

If you have an existing account with DMP Assistant or previous version of DMP Builder.

Sign up

New to DMP Assistant? Sign up today.

Please note that we are currently working on single sign-in authentication. For now, please create a new DMP Assistant account. You will have the option to link your DMP Assistant account to your campus ID when that feature becomes available.

Create a new plan

Please select from the following drop-downs so we can determine what questions and guidance should be displayed in your plan.

If you aren't responding to specific requirements from a funder or an institution, you can choose the **Portage Data Stewardship Template**. The Portage Data Stewardship Template is based on internationally accepted standards and best practices. It has been prepared and is maintained by a group of research data management experts from research libraries across Canada.

To see institutional questions and/or guidance, select your organization.

Portage

You may leave blank or select a different organization to your own. If you leave blank, default Portage DMP template will be used

FRDR ArcticNet 1304 - Baffin Bay and Northwest Passage CTD data

FRDR Gratton, Yves — 2017-01-09

+ Show Details

FRDR Geo-referenced digital photographs and videos with associated GPS waypoints and tracks for terrestrial ecosystem types on the

- Entered a partnership with Compute Canada in January 2016 to develop an integrated data repository with preservation processing and discovery services

Federated Research Data Repository

RDM Platforms

- Federated Research Data Repository
 - Components of the repository and discovery engine are complete;
 - UBC Digital Collections user interface adopted for searching in Dec 2016
 - Currently in alpha test mode;
 - Beta mode during summer 2017;
 - Production in Jan 2018
- Partnerships include Compute Canada, Globus, CARL-Portage, UBC

Partnerships in discussion

- Dataverse North
 - Multi-institutional agreement to provide access to Dataverse repository instances
 - Scholars Portal middleware development to support archival processing through FRDR
- Jupyter Notebooks and the Pacific Institute of Mathematical Sciences
 - Working together to support data repository interoperability with analytic tools provided in Jupyter Notebooks

Thanks for you attention
